ZotAgent Local - Integration Test

Synthetic document for local verification. Not a scientific publication.

1. Connection goal

The reading workspace connects Zotero to an existing local Codex account.

The local runtime preserves conversation history and streams real replies.

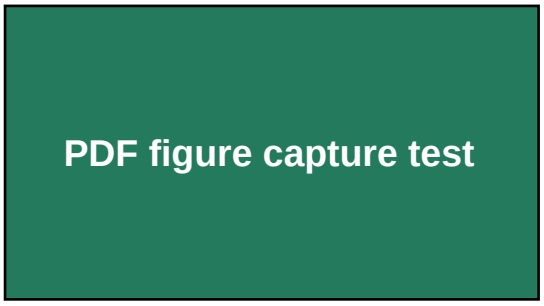
2. Evidence and context

PDF text selections, screenshots and additional papers are explicit context.

The primary paper stays fixed throughout a reading session.

3. Notes and portability

An answer can be exported as Markdown or saved as a Zotero child note.

Original PDF bytes are never modified by the chat workflow.


Example equation: E = m c^2
